He also asked the Minister of Health, Olivier Véran, to write to doctors this Thursday in order to specify a certain number of "reciprocal commitments" on the continuation of the vaccination.----------

However, the representative of a union present at this meeting, is pessimistic, "We expressed the feeling of contempt and anger on the ground", and adds. "I was waiting for clear answers and I did not have any clarification. I understand that the government is subject to the vagaries of the arrivals of the various laboratories, but all this is very disappointing."

Thursday, in a press release, the Federation of Doctors of France described "a lunar meeting", with "the impression of being in the principal's office who is trying, you children, to patch things up with the professor". PRESS RELEASE FROM THE FEDERATION OF DOCTORS SDE FRANCE----------

March 10, 2021 - 10:50 p.m. - "The doctors' unions and their order were invited at the end of the day to a lunar meeting with the Prime Minister, the Minister of Health and their advisers. We had the impression of being in the principal's office who is trying, you children, to mend you with the teacher. It was said by the Prime Minister that he therefore noted hiccups and wording errors on the side of the public authorities. As such, we asked that a letter of apology be sent to all the doctors for the communication errors which made them responsible for a slowdown in vaccination even when we noted their strong mobilization but stock defects.----------

Doctors who had to cancel appointments made with their patient over several weeks since they had been told that finally, the vaccine supply would be continuous. When the government talks about stocks, we physicians are talking about patients.

Patients sorted with calculated risks.This meeting was undoubtedly intended to be a calm one. In fine, it testifies once again to a real contempt for the vacuity of the words and to the total absence of a real vaccination strategy in phase with a real absence of a health strategy. We, doctors, expect from Minister Olivier Veran the written apologies that he has undertaken to pass via the Council of the Order and the Prime Minister, public words, recognizing the mobilization of so-called city medicine, during his next televised intervention. Finally, from now on, we also want to be recognized as entrepreneurs and that Minister Bruno Le Maire be included in these meetings. The startup Nation must also look at its entire entrepreneurial fabric and the liberal doctor is one of them. Entrepreneurs, recruiters, caregivers and people we are!"
